

# ultraJET

Aircraft Air Conditioning System

## COOL YOUR JETS!

A/C systems like the iAIRE ultraJET system are utilized by airports, airlines, and in military applications to heat and cool aircraft while they are on the ground awaiting deployment or when their avionics are in need of calibration.

iAIRE's unique configuration allows for smooth airflow at the extremely high static demands of the ducting in the aircraft, as well as quick connection to the aircraft. This, along with a "portable" design, make "ultraJET" the best choice for cooling aircraft all over the globe.

### Features & Benefits:

- Compact and Portable Design
- High Efficiencies
- Available in multiple Capacities and Voltages
- Manufactured in the U.S.A.
- Available with iAIRE's Patented "Solar HVAC" option
